

## Vision Coatings High-End Paint Offerings!

The Vision Group is a customer-centric, technology-driven group of companies focused on the building products industry. Our founder and Chairman, Vic De Zen, has spent over 40 years in the manufacturing sector and is a recognized leader in the building products industry.

Vision's products include a wide range of applications, including; columns, decking, fencing, railings, steel doors and frames, basement windows, custom profiles, and transportation.

As part of the Vision Group of Companies, Vision Coatings is the North American leader in high-end finishing. Since 2018 Vision Coatings has provided our manufacturers with the professional service and quality it has become accustomed to

Vision Coatings offers a wide range of colours, dimensions and run sizes in our 50,000 sq. ft. facility in Vaughan, Ontario. Equipped with our industry-leading UV ToughCoat, UV Tough Coat Cool-Cure systems, and a 2,000 sq. ft. traditional UltraFinishCoat paint booth. All quality coatings meet test procedures and performance requirements for superior performance organic coatings.

## UltraFinishCoat, UV ToughCoat, UV ToughCoat Cool-Cure

Vision Coatings is proud of our growth and continued process improvements and innovation. Part of these improvements include rebranding our High-End Paint Processes. Virtually unlimited colour options available.

**UltraFinishCoat** – Water-based paint finish.

**UV ToughCoat** – UV Tough Coat paint finish.

**UV ToughCoat Cool-Cure** – Premiere Eco-Friendly UV Tough Coat Cool-Cure.

*The meticulous process of painting window and door profiles or any building product, begins with thorough preparation. Our skilled tradespeople clean and prepare the surfaces to ensure a flawless canvas for either of our three paint application processes.*

*Quality control measures are implemented throughout the lines to catch any imperfections.*

*Whether you select UltraFinishCoat, UV ToughCoat, or UV ToughCoat Cool-Cure, you are assured of not only a quality finish but durability against the elements.*

---

### **UltraFinishCoat:**

- 2,000 sq. ft. custom enclosed spray booth - one of the largest in North America.
- High-capacity production with an estimated output of 500,000 linear feet per month.
- Entire stock of water-based paints that are more environmentally friendly than traditional solvent-based paints.
- High-tech dedicated inflow and outflow ventilation systems ensure a clean and sanitary painting environment.
- Experienced team of paint specialists with more than 100 years of collective experience in the fenestration industry.
- Engineering team to work on evolving the processes
- Quality support on each team
- Advanced spectrophotometry technology ensures consistent colour accuracy across all hand-painted jobs.
- Despite the surface preparation required, traditional paint is still one of the most popular methods for applying coloured finishing because of its flexibility.
- Through brush or spray, the colour options for traditional paint are virtually limitless – you can even achieve a textured or metallic finish depending on the paint you're using.
- Because a skilled operator is manually applying the paint, you can apply the finish to odd shapes, including installed windows or doors.

## UV ToughCoat:

- Leading-edge technology
- Unique finishing process
- Exclusive coating materials
- Fully self-contained advanced coating solution
- Significantly harder finishes than conventional paint
- Combination of technology, process, and exclusive materials
- Faster "instant cure" turnaround times
- Clean, dust-free finish with a more durable coating, 7X harder than standard water-based processes
- No VOCs or Harmful Air Pollutants (HAPs)
- UV-stable through lower heat absorption rates, making our products far more fade-resistant in hot, sunny climates
- Tested to conform to Test Procedures and AAMA 615 standard for superior performing organic coating on plastic profiles

## UV ToughCoat Cool-Cure

- State of the art coating technology
- Medical grade curing lamps are implemented
- Only enough wavelength is generated for targeted curing
- A harder coating is achieved by generating 12-24 times more energy at the targeted wavelength
- Curing at higher energy and lower temperatures (30 F lower)
- Near zero IR emittance
- Much more durable and harder than other similar coatings
- Vision Coatings has recently upgraded Ultra ToughCoat lines to LED
- 50% more capacity compared to UltraFinishCoat
- Much more durable and harder than other similar coatings

Vision Coatings, together with a highly experienced team, has some of the most advanced technologies in the world, and we are here to serve the needs of our customers, both existing and new, with the best quality, care and attention to detail you have been accustomed to. Please feel free to contact our corporate offices or reach out to your Account Manager.

***"Our mission is to help our clients and partners deliver "superior" quality products to their customers, in less time".***
