

# VISION COATINGS NEW PRODUCT ANNOUNCEMENT

**UW**  
**ULTRAWRAP**

**Lamination!**

## Why work with Vision Coatings?

*"Our Vision is to inspire, create, and innovate".*

**We take care of our customers! – Always available! – Quick and accurate response times! – Accommodating!**

- Our customers are seen as partners, where we are accommodating, available, and customize to each unique request.
- Vision Coatings has the ability, resources, and support to grow to scale alongside you.
- Lamination and paint colour application processes to meet virtually any customer requirement.
- Premium quality and dedicated engineering team.
- Constantly investing and evolving, while improving processes with leading technology.
- Stocking program availability, proudly offering 24/7 operational capacity, and at least 500,000 LF per month.
- Supported by the resources of Vision Extrusion Group, the largest extruder in North America.
- Single-source solution, with the logistical advantage and savings, of both extrusion and finishing options in one delivery.
- Offering all finish options currently available for the fenestration industry.

**Vision makes you look good to your customers – Fast Lead Times – Always working to meet your needs!**

**"Achieve More with Vision Coatings Industry-Leading Colour Solutions"**

# NEW PRODUCT ANNOUNCEMENT ULTRAWRAP LAMINATION

## UltraWrap Features The Vision Coatings Difference

- **DURABILITY** reduces need for on-site repairs or touch ups.
- Film thickness is 10 mil vs 3 mil for paint.
- Will not chip, crack, chalk or fade.
- Lowest heat build up, making the best option for dark colours and retaining minimal heat.
- Consistent defect free finish.
- The extra film layer contributes to the overall energy efficiency of the window.
- State-of-the-art, highly automated wrapping lines.
- Advanced production processes.
- Conforms to the highest quality standards in compliance with North America RAL-GZ 716.
- VCL is uniquely able to offer a hybrid paint and lamination service.

- Traditional paint process offers the most **FLEXIBILITY**.
- Ability to finish small production runs.
- Limitless colour options including custom colours.
- Can process the most complex shapes.
- Spectrophotometry technology ensures consistent colour.
- **ECO-FRIENDLY**, isocyanide free offers the greenest options.

- Cool-Cure is State-of-the-art coating technology.
- Dust-free finish is 7x harder than standard water-based.
- Limitless paint coverage.
- Best option to cover difficult to reach surfaces.
- Highly automated with consistent surface prep.
- Superior quality with paint thickness control.
- UV-stable through lower heat absorption rates.
- Fade-resistant in hot climates.
- **MOST COST-EFFECTIVE** for high volume jobs.
